

1

Valley fold in half. Then valley fold both top edges down to center. TURN OVER

2

Valley fold corners in. Valley fold both lower flaps up along bottom edge of bill and tuck inside. TURN OVER

3

Vally fold center edges to outside edges and unfold. This fold will be used later on when forming the top and bottom wings. Again, TURN OVER

4

Valley fold bottom edges to outside edges. Fold the top layer only and only to center. See next step.

5

Colapse in half. To colapse lift center and fold left half over right half. This is a natural colapse along existing folds. This picture is halfway into the colapse. See next step to see what it will look like when finished.

6

Now you are going to open the colapse you just made but in a different direction. Take the top flap and lift it up and to the left. This will form a triangle flap on the under side. See next step.
